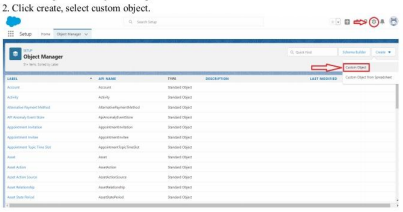
4	Location	Text

Activity & screen shot

Create a custom object for Recruiter:

To create a custom object, follow these steps:
1. From setup click on object manager.
2. Click create, select custom object.



3. Fill in the label as " Recruiter ".
4. Fill in the plural label as " Recruiters".
5. Record name: " Recruiter Number"
6. Select the data type as "Auto Number".
7. Under display format enter "REC-{0000}".
8. Enter starting number as 1.
9. In the Optional Features section, select Allow Reports and Track Field History.
10. In the Deployment Status section, ensure Deployed is selected.
11. In the Search Status section, select Allow Search.
12. In the Object Creation Options section, select Add Notes and Attachments related list to default page layout.

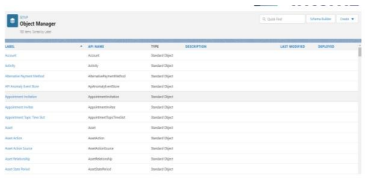
Objects

Activity

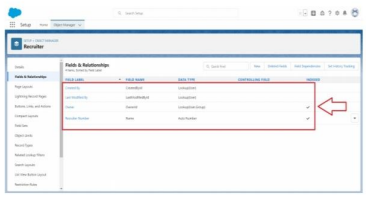
Objects are database tables that permit you to store data that is specific to an organisation.it consists of fields (column) and records (rows)

Step 1:

*Create a custom object for **Recruiter,jobs, candidate,job application object ,Tab.**



2.From the sidebar, click Fields & Relationships. Notice that there are already some fields there. Those are the standard fields.



Fields

Activity

Step 2

Fields represents what the columns represent in relational database.it can store data values which are required for a particular object in a record.

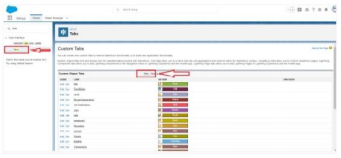
***We create fields are below**

1.job title

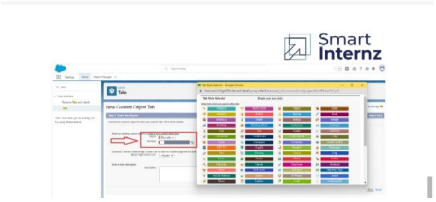
2.Recruiter

3.Description

4.Location



4. Select the created object Recruiter and tab style for the new custom tab

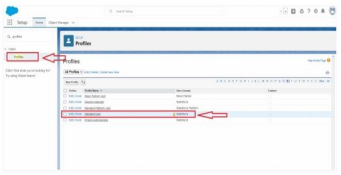


Tabs

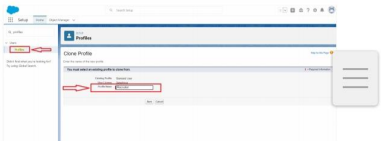
Activity

step 3

A tab is a user interface element that allows users to navigate to different sections of the platform such as accounts, contacts,Leads,and opportunities.
They are typically located at the top of the screen and can be customised to fit the needs of the organisation
***We create tab for Recruiter in the step 3**



4. For Profile, enter Recruiter.

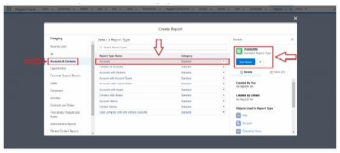


Profile

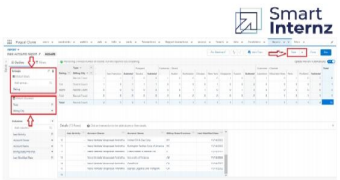
Activity

Step 4

A profile is a group/collection of settings and permissions that define what a user can do in Salesforce.
A profile can be assigned to many users,but user can be assigned single profile at a time.
***We create profile for a application**



3) And the report type has accounts.
4) In the details section select the option start report.
5) In the filter pane select All accounts to show me.
6) And All time is created.
7) In the outline pane, group rows select Rating and in group columns select Account Name.
8) In the columns section add Type and Billing city



Creating a report

Activity

Last step

*Create a report that displays rating of the account and which has type and account name

Trailhead profile public URL

5).Advantages

- **It is helpful to guide the applicant which one apply jobs**
- **Job searching will be easy to the candidates**

Disadvantages:

- **This application only for the educated applicants**
- **Must guidelines options there**

6) Application

The job application tracking system app is useful to applicants which are they applied jobs and searching jobs.the essential for the applicant's guide to search jobs so this application is will help to the applicants.

7). CONCLUSION

The application will help to the applicants and it is improving job searching applicants view of the Recruitments.

The application designed to be our future wolrd importance .

8). FUTURE SCOPE

The application is creating for the job seekers and add free application Also.
It have advanced options for the applicants use
And it is nice to use applicants

Our nation also first place in **youth population .**so this application will satisfy the needs.
